

The following are EPEAT certified products that are offered by PC Professional's manufacturing partners.

* Please contact PC Professional or your Account Manager for further information or pricing for any of these products.

About EPEAT: EPEAT is a system to help purchasers in the public and private sectors evaluate, compare and select desktop computers, notebooks and monitors based on their environmental attributes. EPEAT also provides a clear and consistent set of performance criteria for the design of products, and provides an opportunity for manufacturers to secure market recognition for efforts to reduce the environmental impact of its products.

The EPEAT Registry on this web site includes products that have been declared by their manufacturers to be in conformance with the environmental performance standard for electronic products - IEEE 1680- 2006. The standard is summarized here, and may be purchased from the Institute of Electrical and Electronics Engineers. EPEAT operates a verification program to assure the credibility of the Registry.
